 Precision Planting Ready - Folding and Rigid Frames

Designed and  
Manufactured  
in the UK

Our frames are available in many different widths to suit multiple row configurations.

Folding Frames:

- Cat 3 Hitch
- From 4.4m to 6.4m (specials available on request)
- Vertical Fold to under 3m transport width with Furrowforce
- Easy fitment of Vac Fan, Deltaforce Valve, PDM and Alternator

Rigid Frames from 3m to 9m

- Cat 3 Hitch
- Easy fitment of Vac Fan, Deltaforce Valve, PDM and Alternator

All our rigid and folding frames are designed for simple fitment of Precision Planting components.

- Mounts as standard for:
- Deltaforce Valve Block
- Alternator
- Vacuum Fan
- PDM
- Vacuum Manifold

Counterweight kits are available both to be mounted on the front of the bar and on the end of the wings.

Depending on your number of rows and downforce requirement we can add up to 750KG to the planter bar.

Adjustable gauge wheels are available as an option.

These allow you to set the depth of the toolbar in work to ensure your Deltaforce system is working in its optimal range.

Multiple row configurations:

Any row unit with a 7"X7"/180mmX180mm will fit to our frames.

Odd or even rows are possible.

The design of the frame is such that there are very few obstacles when changing row spacings.

For road transport there is a locking valve to retract Deltaforce Cylinders. This means the rows do not move whilst roading and also maintains sub 3m transport width even with Furrowforce installed.

- Bulk fill seed option coming soon!
- Narrow row option coming soon!
- Complete Planter solutions available for the UK market

Granular Fertiliser Kit

- 32mm Distribution head for dry fertiliser 4-18 outlets
- Optional dry fertiliser openers available for most row units
- Row Cleaners also available on request

Liquid Fertiliser Tanks

Liquid fertiliser tanks available.

- Features:
- Precision Plant V apply HD ready
- 2" Quick Fill
- Dual Filters
- 30L/Min Electric Diaphragm Pump or 50L/Min Hydraulic Diaphragm Pump
- Road Lights
- In Cab Control for Pump

Sizes Available:  
 750L, 1100L, 1200L, 1500L, 200L and 1800L/1050 Split  
 (available with 2 pumps for dual product).

Liquid Fertiliser Tanks
